# WHO WE ARE

## Introduction

Founded with a vision to drive progress and sustainability in Somalia, Vision Solutions Ltd has been a pioneer in delivering excellence across major sectors. Our team comprises of diverse professionals and contractors who bring a wealth of experience and expertise, ensuring high-quality solutions tailored to your needs.

At Vision Solutions Ltd, we are dedicated to delivering innovative and sustainable solutions across the Horn of Africa. With over four years of operational excellence, our diverse team and extensive experience enable us to provide exceptional services in the Supply Chain, Technology, Renewable Energy and Food Security sectors.

# MISSION & VISION

## MISSION

- Our mission is to deliver cutting-edge, efficient and sustainable solutions that not only meet but exceed the expectations of our stakeholders.
- We are committed to driving transformative growth across key sectors, including Supply Chain, Technology, Renewable Energy and Food Security.
- By leveraging innovation, technological expertise, and a deep understanding of global challenges, we aim to improve the quality of life for individuals and communities.

## VISION

- We envision becoming the foremost global leader in providing integrated, innovative solutions that empower businesses and communities alike.
- Our commitment to excellence will set us apart as a trusted partner in each of the sectors we serve.
- We aspire to be recognized not only for our technical expertise but also for our unwavering dedication to sustainability and social responsibility.
- By fostering an ecosystem of continuous improvement and collaborative growth, we aim to drive positive change, enhance resilience and create a more sustainable future for all.

# WHAT WE DO

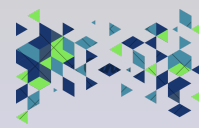

With a deep commitment to excellence and a focus on driving positive change, we provide tailored solutions that address the unique challenges of the Horn of Africa. Our end-to-end services are designed to empower businesses, improve communities and create a more sustainable future for all.

## SUPPLY CHAIN

We provide end-to-end solutions for the supply, delivery, installation and commissioning of various goods and services making your procurement needs feel like a walk in the park.

## TECHNOLOGY

Transform your business with our turnkey IT solutions that is crucial to maintain your market competitiveness and accelerate business growth.

## CLEAN ENERGY

As the world shifts to cleaner energy, we offer scalable solar solutions that reduce environmental impact and provide long-term cost savings while enhancing efficiency and a sustainable future .

## FOOD SECURITY

Enhance your agricultural and blue economy operations with our value-added services, next generation technologies and bulk fresh produce supply.

# SUPPLY CHAIN

# OUTSOURCING & PROCUREMENT

## SUPPLY AND PROVISION OF GOODS & SERVICES

We provide professional, hands-on outsourcing and procurement services as well as installation and commissioning of various equipment and systems. Our experienced technicians ensure that all installations are completed on time, meet safety standards, and function optimally from day one. Whether it's complex machinery, IT infrastructure, or renewable energy systems, we manage and oversee the entire procurement and supply chain process, providing thorough training, support and documentation for your team to ensure smooth operations post-installation.

# SHIPPING & LOGISTICS

## EFFICIENT SUPPLY CHAIN MANAGEMENT

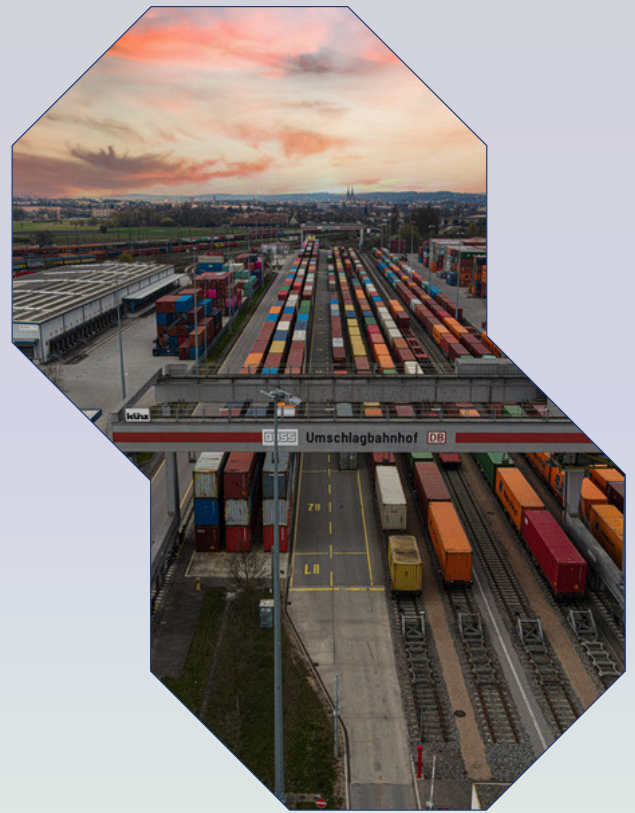

From procurement to timely delivery, our supply chain management services ensure that products and materials are sourced, transported, and delivered efficiently. We leverage advanced tracking systems, strong vendor relationships and logistics optimization techniques to ensure that your products arrive on schedule and in excellent condition. Whether for raw materials, finished goods or specialized equipment, we manage the flow of goods to meet your business needs, reducing lead times and minimizing disruptions.

# AUTOMATION & INTEGRATION

## END TO END SUPPLY CHAIN SOLUTIONS

We offer comprehensive end-to-end supply chain management solutions that cover everything from the initial order to the final deployment of goods and services. Our team coordinates every stage of the process, ensuring that each phase is completed on schedule and within budget. By providing complete visibility and control over your supply chain, we enable you to focus on core business activities while we manage the logistics, installation, and ongoing support. Our solutions are designed to reduce operational complexity and improve efficiency at every step.

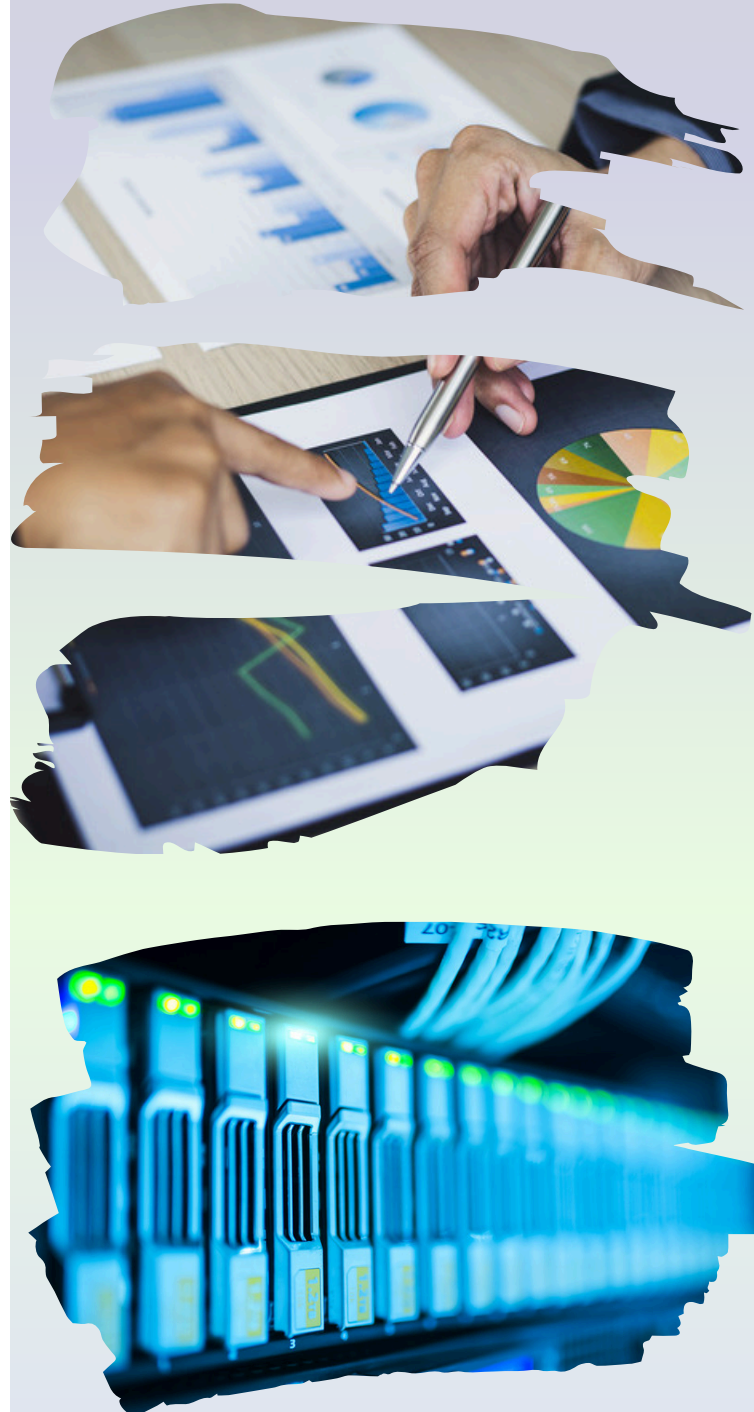

# TECHNOLOGY

# CONSULTATION & ADVISORY SERVICES

## TURNKEY ICT CONSULTATION

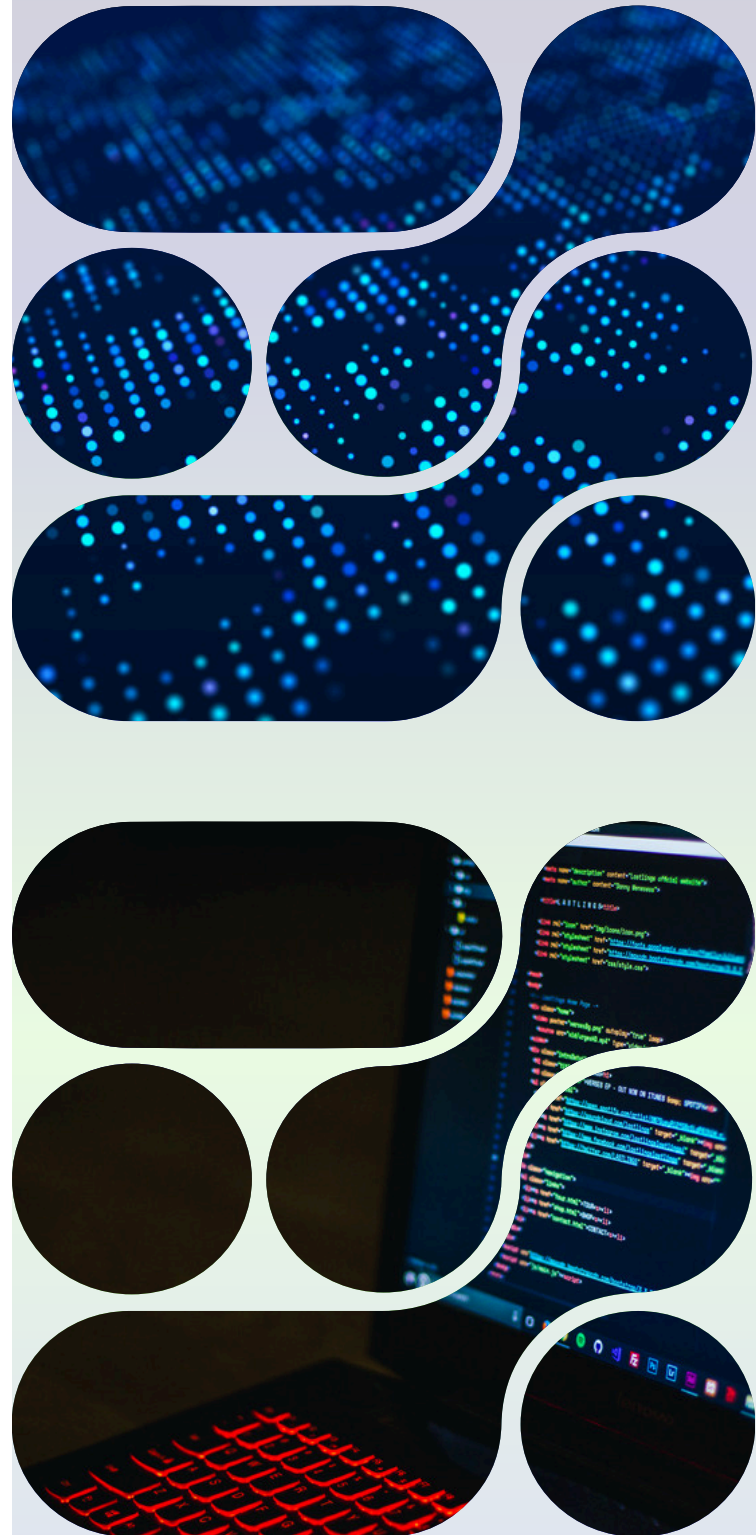

We offer expert IT consulting and advisory services to help businesses streamline their technology strategy. Our approach begins with a thorough assessment of your current infrastructure and business goals. We then provide tailored advice on optimizing your systems, whether through cloud adoption & migration, network enhancements, cybersecurity improvements or data quality assurance and management. We help you plan a future-proof IT strategy that aligns with your growth objectives, ensuring that your technology supports your long-term vision.

# SOFTWARE DEVELOPMENT

## FULL-STACK SYSTEM DEVELOPMENT

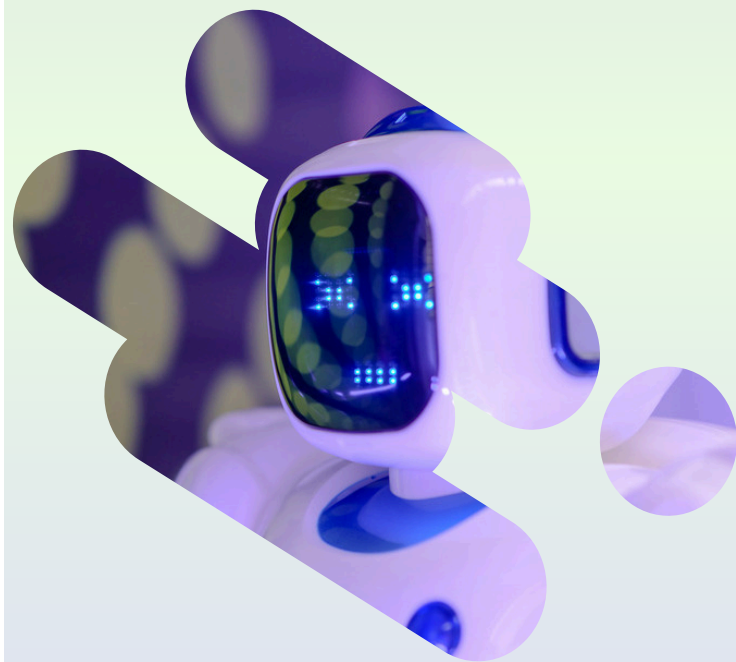

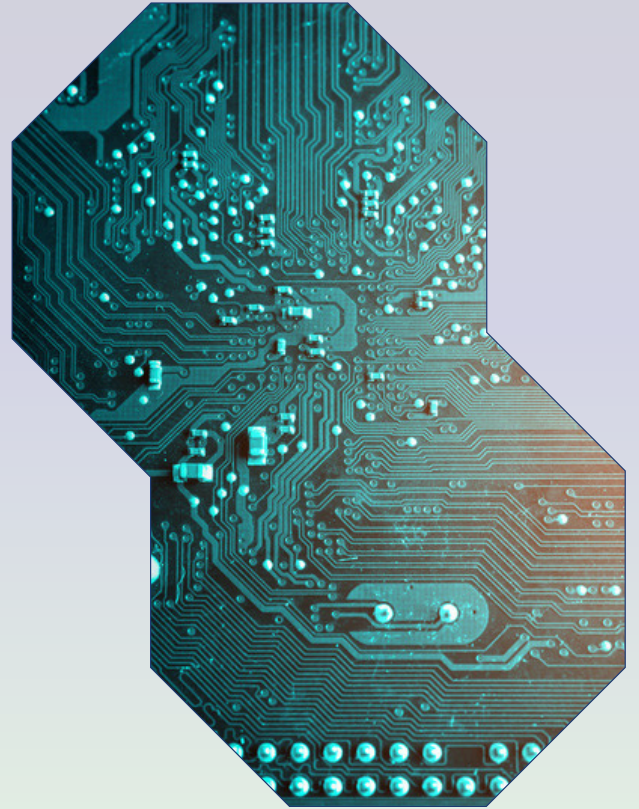

Our software development services cover everything from infrastructure setup to complete system integration. We specialize in the development, deployment and maintenance of enterprise-level IT solutions, including cloud-based Software-as-a-Service (SaaS), web and mobile applications, PWA applications, artificial intelligence powered systems and custom software solutions. Our experienced team handles the full deployment lifecycle—from initial design and testing to seamless integration into your existing workflows. We ensure minimal disruption and maximum performance during the implementation process.

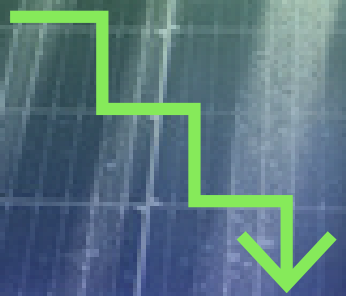

# HELP-DESK SUPPORT & MAINTENANCE

## ONGOING SUPPORT & MAINTENANCE

Technology needs continuous attention to ensure security, performance and utmost reliability. Our support services provide peace of mind with proactive monitoring, rapid troubleshooting and regular system maintenance. We offer 24/7 support for critical IT systems and provide regular updates, patches, and cybersecurity enhancements. Whether it's cloud hosting, data backup, or network security, our dedicated team ensures that your IT infrastructure remains secure, scalable, operational and fully compliant with relevant regulations.

# CLEAN ENERGY

# SOLAR PUMPS

## SOLAR POWERED WATER PUMPS

Our solar-powered pumping systems provide an eco-friendly solution for water pumping in agricultural, industrial, and residential settings. These pumps use renewable solar energy to operate efficiently and reliably, significantly reducing energy costs and reliance on grid electricity. Whether you need to pump water for irrigation, livestock, or industrial processes, our solar pumps are designed to withstand harsh environmental conditions, ensuring long-term durability and low maintenance.

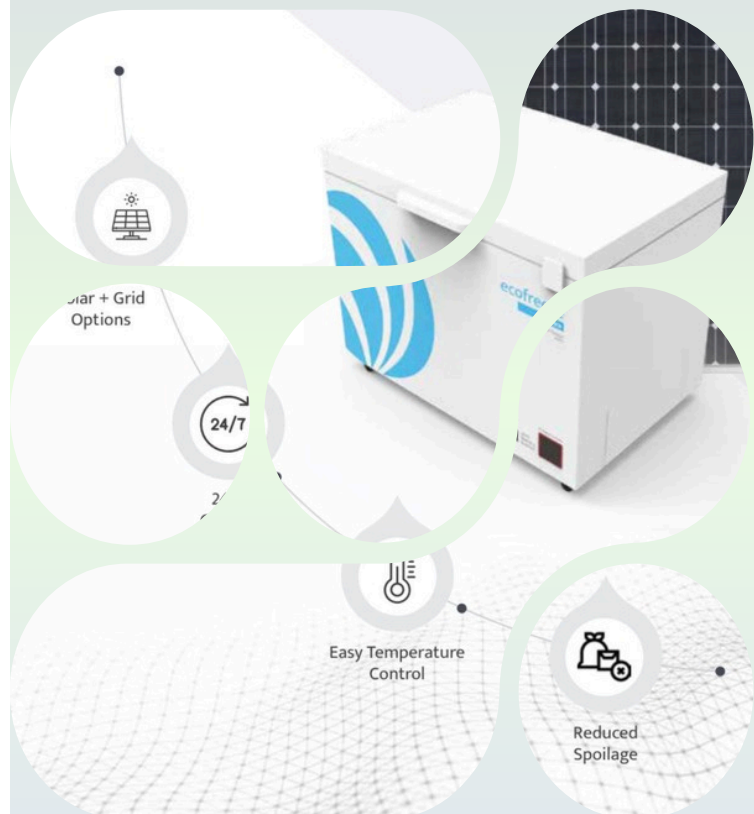

# SOLAR COOLING

## SOLAR POWERED COOLING SYSTEMS

Our solar powered cooling solutions are ideal for businesses and communities in areas with limited access to reliable electricity. These energy-efficient systems use solar power to provide refrigeration for food storage, medical supplies and other critical applications. By harnessing the sun's energy, our solar cold chain systems, refrigerators and freezers reduce electricity bills, increase energy independence, and help reduce the carbon footprint of your operations. With robust and reliable performance, these systems are perfect for both rural and urban environments, ensuring that perishable goods remain safe and fresh for longer periods.

# TAILORED SOLUTIONS

## CUSTOMIZED SOLAR ENERGY SOLUTIONS

We provide tailor-made solar solutions for a range of commercial, agricultural and industrial applications. From large-scale solar power plants to off-grid solar installations, urban electrification to residential projects, our team designs and implements clean energy systems that maximize energy savings and improve livelihoods while minimizing carbon footprint and reducing the environmental impact. Our custom solutions are holistic in approach designed with your specific needs in mind, helping you achieve and maintain energy independence and long-term sustainability.

# FOOD SECURITY

# VALUE ADDITION MECHANISMS

## INNOVATIVE TECHNIQUES

We offer innovative techniques and technologies to add value to raw agricultural products, improving their quality and marketability. This includes post-harvest processing, packaging and branding that help increase product shelf-life and appeal to higher-end markets. By leveraging modern processing methods and equipment, we help farmers and producers maximize the profitability of their crops, turning raw produce into value-added products like juices, dried goods or packaged vegetables.

# COMMERCIAL SUPPLY

## BULK SUPPLY OF PERISHABLE GOODS

We source and supply a wide variety of fresh fruits, vegetables and exotic produce directly from farms to the market. Our logistical expertise ensures that fresh produce arrives quickly and safely, maintaining optimal quality and shelf life. With reliable sourcing partnerships and a commitment to freshness, we meet the growing demand for high-quality agricultural products, supporting both local and international markets. Whether for retail, wholesale, or direct-to-consumer sales, we offer a dependable supply chain for your fresh produce needs.

# FLEXIBLE STORAGE SOLUTIONS

## SCALABLE STORAGE FOR PERISHABLE GOODS

Our solar-powered cold storage solutions are specifically designed to address the challenge of preserving perishable goods in areas with limited access to reliable electricity. By using solar energy, our cold storage systems allow you to store fruits, vegetables, dairy and meats without the high costs of traditional refrigeration. These systems are environmentally friendly, cost-effective and can be deployed in remote areas where access to grid power is unreliable or nonexistent. With enhanced storage capacity and minimal operating costs, these solutions significantly reduce food waste and extend the shelf life of products, ensuring that valuable agricultural goods reach the market in peak condition.
